

BOUNDED CONTEXT - FUNCTIONAL CAPABILITIES

UBIQUITOUS LANGUAGE	
Functional Capabilities	<p>The purpose of the four-corners model is to facilitate secure delivery of an e-Invoice from a Seller to a Buyer. The model exposes two core capabilities.</p> <p>SERVICE DISCOVERY is the way the details of the secure route to the buyer are revealed and the capabilities of the buyer available through the e-Invoice process are exposed.</p> <p>e-INVOICE DELIVERY is the creation of a compatible invoice which contains a request for payment and specifications for execution.</p>
Service Discovery	<p>Seller must discover the appropriate path to present the invoice to the buyer. Seller queries SML to discover the route to the SMP which relays capability and final end point for invoicing the Buyer.</p>
e-Invoice Delivery	<p>Specifications for delivery having been obtained previously through the service discovery, a request for payment is made between the entities using the agreed upon interoperable format.</p>
